

# Are **Baleen Polyp Traps** the answer to your cost containment issues?

cat# NBPT520  
100/case (5 trays of 20 traps)

**No more fishing for polyps  
with toothpicks, tweezers, or coffee filters!**

Minimize your exposure to body fluids  
and cut down on procedure time.  
With the Baleen Polyp Trap, fluids are  
suctioned through the special net,  
leaving behind just the polyp. Simply  
place the trap with its captured polyp into  
the biopsy vial... it's **quick, clean & easy!**

As an added benefit, the Baleen Polyp Trap  
excels at catching small sessile polyps  
which some other traps miss.

**PLUS... it's the most cost-effective  
screened polyp trap on the market today!**
