

Why are more and more endoscopy units

SWITCHING to the **Baleen Polyp Trap** ?

*No more fishing for polyps
with toothpicks, tweezers,
or coffee filters!*

Minimize your exposure
to body fluids and cut down
on procedure time.

With the Baleen Polyp Trap,
fluids are suctioned through
the special net, leaving behind
just the polyp. Simply place the
trap with its captured polyp
into the biopsy vial...
it's **quick, clean & easy!**

As an added benefit,
the Baleen Polyp Trap excels
at catching small sessile polyps
which some other traps miss.
PLUS... at just \$1 each, it's
the most cost-effective
screened polyp trap!

cat# NBPT520
\$100/case (5 trays of 20 traps)
